

Topic Nº 2. Designing Performance-Based Instruction

What is performance based instruction?

Performance based learning is an approach to teaching and learning that emphasizes students being able to do, or perform, specific skills as a result of instruction. Performance based learning typically includes activities and tasks that are authentic and meaningful to the students.

What are the performance based activities?

One easy way to have students complete a performance-based activity is to have them do a presentation or report of some kind. This activity could be done by students, which takes time, or in collaborative groups.

How do you create a performance based assessment?

- ❖ Identify goals of the performance-based assessment
- ❖ Select the appropriate course standards
- ❖ Review assessments and identify learning gaps
- ❖ Design the scenario
- ❖ Gather or create materials
- ❖ Develop a learning plan

What are some examples of performance based assessments?

Dramatic performances are one kind of collaborative activities that can be used as a performance-based assessment. Students can create, perform or provide a critical response. Examples include dance, recital, dramatic enactment. There may be prose or poetry interpretation.

How do you create an instructional design?

A Step by Step Guide to the instructional design process:

Step 1: Analyze requirements

Step 2: Identify learning objectives

- Step 3: Develop design
- Step 4: Create a storyboard
- Step 5: Develop prototype
- Step 6: Develop training
- Step 7: Deliver training
- Step 8: Evaluate impact

What is a major advantage of performance based assessments?

Performance-based assessments can empower students by giving them freedom to make choices, within parameters set by teachers, about the direction that their learning should take. Giving students this kind of ownership of their learning process can be a powerful motivator.

What are the performance criteria?

Performance criteria are the expression of what is to be measured and why. The selection process involves identifying dimensions or variables relevant to an enterprise's successful operation. Relevancy is the most important concern in selecting performance variables.

Top 8 Types of Assessment

- ❖ Summative Assessment
- ❖ Formative Assessment
- ❖ Evaluative assessment
- ❖ Diagnostic Assessment
- ❖ Norm-referenced tests (NRT)
- ❖ Performance-based assessments
- ❖ Selective response assessment
- ❖ Authentic assessment
